To
The Hon'ble Minister for Agriculture, Fisheries &c.,
Madras Secretariat.

Representation by M. M. Sivaraya M.L.A.
— 12-5-52

In my constituency (Mulky S.K.), in the north western corner there is a locality known as Kodi in Hejmady Village. It is a narrow strip of sandy tract on the sea-shore separated from the mainland on the east by the mulky river which is situated as a back water stream flowing into the sea at the southern edge of the locality.

1. During the last one year, the sea at the southern extremity had been making in-roads into the inhabited locality destroying houses and cocoa-nut plantations. Nearly more than 50 houses and about 2,000/ cocoanut trees have disappeared by the rush of sea-water, and the erosion shows no signs of abating. The owners of the houses and gardens who have lost their all are either mogaveras or Billavars who live by the sea.

Their difficulties are two fold. One is that they have lost all that they possessedas immoveable property. Secondly, after having lost their all, they have not the wherewithal to live. If they should continue to live, they must have habitations cloth to Sea. But there is not an inch of Government land available wherein to build huts to shelter their heads. With all the property destroyed, with no place of shelter, they are facing penury and starvation.

The only way to help is for the Government to acquire ~~promboke~~ private land ~~or~~ viz some unused land, garden or otherwise for ~~the~~ house-building, if necessary even on a co-operative basis. This is only by way of a suggestion.

My opinion is that urgent measures of relief have to be undertaken and I request that the Government may be pleased to take necessary steps to provide the required relief as soon as possible.

2. On 9-1-1954, in the night when people, after their hard days work, were shrouded in deep slumber, all of asudden, a cyclonic gale struck the west coast, without extending inland, as if it was intended only against the fisher-folk, and in about 3 or 4 hours of its duration, carried away the big fishing nets, boats and rig and tackle which were lying ~~out~~ on shore causing loss to the tune of one or two lakhs all along the coast. The poor people of Kodi were among the heaviest sufferers, and their representations for relief on this head to the Government have evoked no response.

B. It is necessary that Government should help these poor people with subsidies for the purchase of new equipment which is necessary for their livelihood.

3. In Kodi, there is at present Higher Elementary School, which, I have no hesitation in certifying is one of the best conducted schools in my constituency. The teachers, ~~the teaching~~ teaching that is imparted, the affectionate contact between the ~~teaching~~ teachers and the taught and lastly the rustic appreciation of the work done in the School by the parents and finally the co-operation wholeheartedly given by the old boys of the school are allfeaturesm which deserve praise and commendation

But the public have a grievance which, in my opinion is a real grievance which should be redressed. This school was opened along with two other fisheries schools, one in Malpe 20 miles north and another at Bekal, 50 miles south. Both of t them have since developed into Technical High Schools conferring the advantage of ~~for~~ free education to their children upto the S.S.L.C standard. The public of Kodi ask " why deny this privilege to the children of Kodi H.E. School , whene even adult education is patronised and Hindi also is encouraged in addition to the ordinary curriculam of studies.

There can be no doubt that Kodi has striven in a great measure to ~~kkm~~ be fit for this concession. I feel Kodi richly deserves this concession and I request that the Government may be pleased to take early steps to grant the concession of raising the H.E. School to the grade of a Fisheries Technical High School.

4. The narrow back-water separating Kodi from the main-land is an inconvenience which is the cause of many a hardship to the ~~coming~~ community at Kodi . During low tide, there not being sufficient water even for plying of boats , the crossing-over presents great difficulties. There being no dis-pensaries at Kodi, the difficulty of getting any medical relief from the main land ^ (specially in the night) can be better imagined than described. A foot-bridge about half a furlong long, would ~~tned~~ lend to alleviate the hardship that people are subjected to now.

The Community Development project is operating in this area, and I feel that this a matter which is within its competence. However I am ~~am~~ unable to say why this matter, which ~~presents~~ (seems) to me, is perhaps the most urgent and necessary amelioration, has not (been) touched till now. It may be that the ~~stay~~ Snag is not (in the) fact that the required contribution ~~fxxxkkm~~ from the people may not be forthcoming. The Kodi people who are about 3,000 are all poor, backward class, who lead a hand-to-mouth existence and I should think, if the rules permit, an exception will have to be made in the case of the (public) contribution ~~of~~ (for) this foot bridge.

At all events, this is a matter which ~~A~~ deserves favourable consideration specially because it affects the poorer classes. I request that the Government may be pleased to take necessary steps for the construction of this much need-ed foot bridge as early as possible.

Yours faithfully,
Nisewara

Community Projects - South Kanara - Suggestion for improving the lot of fishermen of Kodi in Hejmady village - Representations - Report submitted.

Ref: Govt. Memo No.61985 D.V./54-1 dated 11-5-1954.

Erosion in Kodi in Hejmady Village: In the above matter, the Collector has submitted a separate report in reply to Govt.Memo cited above. I have no further remarks to offer. It is true that the cyclonic gale which occurred in the night of 9-1-1954 took the villagers by surprise and caused substantial damage by washing away the fishing equipments kept on the shore and some of them are still not fully equipped with fishing materials. In this matter, the local fishermen's cooperative society is in a position to assist those who are in hardship by granting loans etc.

2. As regards the conversion of the present Higher Elementary School into a technical High School, the matter has to be examined in consultation with the Education and the Fisheries Departments. It may, however, be stated that this problem is beset with certain difficulties, as a separate High School has been recently sanctioned and opened in the same village and there are two other High Schools at Mulki which are also closeby.

3. Mulki is not even a mile from Hejmady Kodi, where there is already a local fund hospital. There is already a proposal for grant of more amenities to this hospital at a cost of Rs.10,000/- from the Community Project funds. This has been provided for in the revised overall programme. It is no doubt true that there is a ferry to be crossed and this is not a difficult job particularly for fisherfolk.

4. As regards the foot bridge prayed for, it is not one of the items included in the overall programme. The Administrative, financial and technical aspects of this proposal will be examined after the matter is placed before the Project Advisory Committee and its approval is obtained.

Yours faithfully,

K. K. Gnanarayanan

Sub: Community Projects - South Kanara District - Suggestions for improving the lot of fishermen of Kodi -

Ref: 1.Govt.Memo No.61925 (DII)/54-1 dated 11-5-54.
2.This office letter No.6908 X1/54-2 dated 18-5-54.

...

The Kodi Village (Mejadikodi) in South Kanara District was visited by the Inspector of Fisheries, Mangalore and Asst. Director of Fisheries, Mangalore on 3-5-54 and 15-5-54. It is reported that about 45 houses and 2000 coconut trees have been lost due to erosion by the sea. The vast majority of the sufferers are very poor mostly living on fishing or allied industries. The loss of a large number of very good yielding coconut trees which used to supplement their meagre income from the sea is really a hard blow to them. The loss was really heavy to a section of the population least prepared or fitted to bear such loss. The Asst.Director reports that the Revenue Officials had inspected the place and had gathered correct statistics of the losses incurred. It is therefore submitted that a report from the Collector, South Kanara, Mangalore will be more useful and helpful. The Asst.Director is taking up the matter with the Collector and will do whatever is possible.

2. Regarding the conversion of the Mejmadikodi Higher Elementary School into a High School, the Asst.Director reports that there may be objections from the Education Department as there is already a High School at Moolky which is only about a mile from the Higher Elementary School. He also reports that the management of the Moolky Higher School is raising strong objections to the proposals for the conversion of the Fisheries Higher Elementary School into a High School. The Asst.Director has however suggested that it would be worthwhile to convert it into a Technical High School. I am asking the Asst.Director to look into the matter further and report whether there is scope for opening a High School at Mejadikodi.

3. Regarding the last request for the construction of a foot bridge the Asst.Director reports that it is a real necessity to the village. The Project Executive Officer, Mangalore may be asked to take up this matter.

For Director of Industries & Commerce.

Sub: Fisheries - south Kanara District - Mangalore Taluk - Hejmady Village - Kodi - Improving the lot of the fishermen - Proposals - Report submitted.

Ref: Govt. Memo. No. 44111 CII/54, Agri., dated 12-4-54.
Govt. Memo. No.61983 (D.V.)/54-1, dated 11th May 1954.

I submit the following report.

1) Sea erosion in Kodi in Hejmady Village:- The sea erosion at Kodi is a process going on during the past four years and it is still continuing. So far about 25 houses and 200 cocoanut trees have been destroyed on account of this gradual erosion from year to year. The families who were affected by the erosion are carrying on their usual avocation. They are not facing penury or starvation. Out of the 25 families whose houses were washed away, 15 families have already found accommodation in and around the locality. The remaining 10 familites are now temporarily occupying the houses of theirrelatives. They need house sites for putting up houses. About one acre of poramboke land in S.No. 35/2 BI of the same village has been selected by the Revenue Divisional Officer for settling these families. The land selected is near the sea and the affected people are willing to settle down in this land.

2) Loss of boats, nets, etc., by the sea flodds:- A strong gale is stated to have struck the West Coast suddenly on the night of 9-1-1954 and lasted an hour or so. The sea is also stated to have arised along with the gale and is said to have washed away into the sea some nets and boats kept on the entire coast of South Kanara District. No report was recieved from any source about this alleged incident till 22-4-1954 when a special representative of the Mogaveera Yuvak Sangh, Bombay presented to me a petition with a statement of alleged losses sustained by 29 fishermen in the district covering the taluks of Coondapur, Udipi and Mangalore. The Assistant Director of Fisheries, whom I enquired in the matter said that his department had no information so far of the alleged damages and losses by sea floods. I asked him to personally investigate into the matter immediately and report. I also suggested to him to consider the question of grant of loans to the affected persons by the Fisheries Department if his enquiry showed that the alleged losses were real. I have not yet received his report. I also called for reports from the Tahsildars of the coastal areas on the allegations. Some reports have been received and some Tahsildars are still enquiring into the matter. The Coast line is more than 100 miles and all over

P.T.O.

the coast fisherfolk are residing and ~~xxxxxxxx~~ carrying on their fishing operations. Only 29 individuals are alleged to have sustained losses according to the petition. The fact that there was no report or representation immediately after the alleged incident shows that the people did not take the incident as a serious one. On receipt of further reports from the Assistant Director of Fisheries and the Revenue Officials, the question as to what relief is called for will be considered and a further report submitted.

3. Conversation of the present Fisheries Higher Elementary School into a technical High School:-

There are about 400 students of ages ranging from 5 to 14 in the Fisheries Higher Elementary School at Kodi. The school is in charge of the Fisheries Department. The Director of Industries and Fisheries may be asked to examine the request for the conversion of the present Higher Elementary School into technical High School.

4. Provision of a foot-bridge to connect Kodi with Nadikudru:-

The request in this regard is reasonable. The area is under the community Project. The Project Executive Officer, Mangalore will be asked to look into this matter and take necessary action.

PLIGHT OF FISHER FOLK:

The PRAKASHA of Udipi dated May 11 in the course of an editorial on the problems facing the fishermen of South Kanara says that the Cyclone in January had swept away most of their belongings, including boats,. Further the soil erosion caused by the sea in some parts of the coastal areas is causing alarm. The paper appeals to the Government and the public to help the unfortunate fishermen.

A correspondent writes in THE CHANDRIKA dated May 11 that in many areas of Malabar the fisherfolk are finding it hard to keep the wolf off the door on account of the scarcity of fish. The incidence of small pox in certain places makes life more miserable. The writer urges the authorities to effect relief measures.

In paragraphs two of my letter cited I have reported that I am asking the Assistant Director Mangalore to look into the matter of converting the Fisheries Higher Elementary School, Hejmadikodi into a Technical High School as there is scope for opening a High School there. The Assistant Director, Mangalore had addressed the District Educational Officer, Mangalore for his opinion in the matter. I shall submit my final proposals with full financila implications for the conversion of the Fisheries Higher Elementary School into a High School in due course after getting a reply from District Educational Officer and detailed proposals from Assistant Director, Mangalore.

Copy of letter No. 6208-X.1/54-3, dated 21-5-54 from the Director of Industries and Commerce, Chepauk, Madras 5. to the Secretary to Government, Agriculture Department. Madras.

Sub:- Community Projects--South Kanara District--suggestions for improving the lot of fishermen of Kodi.

Ref:- 1. Govt. Memo No. 61985(D.II)/54-1, dated 11-5-54.
2. This office letter No. 6208-X.1/54-2, dated 13-5-54.

The Kodi Village (Hejmadikodi) in South Kanara District was visited by the Inspector of Fisheries, Mangalore and Asst.Director of Fisheries, Mangalore on 3-5-54 and 10-5-54. It is reported that about 45 houses and 2000 coconut trees have been lost due to due to erosion by the sea. The vast majority of the sufferers are very poor mostly living on fishing or allied industries. The loss of a large numberof very good yielding coconu trees which used to supplement theirmeagre income from the sea is really a hard blow to them. The loss was really heavy to a section of the population least prepared or fitted t bear such loss. The Assistant Director reports that the Revenu officials had inspected the place and had gathered correct statistics of the losses incurred. It is therefore submitted that a report from the Collector, South Kanara, Mangalore will be more useful and helpful. The Asst.Director is taking up th matter with the Collector and will do whatever is possible.

2. Regarding theconversion of the Hejmadikodi Higher Elementary school into a High School, the Asst.Director repor that there may be objections from the Education Department as there is already a High School at Moolky which is only a mile from the Higher Elementary school. He also reports th management of the Moolky Higher School is raising strong tions to the proposals for the conversion of the Fisheri Higher Elementary school into a High School. The Assistan Director has however suggested that it would be worthwhile convert it into a Technical High School. I am asking th Director to look into the matter further and report whet there is scope foropening a High School at Hejmadikodi.

3. Regarding the last request for the construction o bridge the Asst.Director reports that it is a real nece to the village. The Project Executive Officer, Mangale may be asked to take up this matter.

....

As stated in my letter cited I had asked the Assistant Director of Fisheries, Mangalore to submit detailed proposals with full financial implications for raising the Hejmadi Kodi Fisheries Higher Elementary School into a Technical High School. The Assistant Director now reports that though the District Educational Officer, South Kanara district was addressed in the matter as early as 21-7-1954 he has not received his final reply in spite of several reminders. He further adds that the approval of the Director of Public Instruction is necessary for converting the Elementary School into a High School as there is already another High School at Mulki which is only about one mile from the Fisheries School. He therefore recommends that the proposals may be taken up for consideration as Part II Scheme for 56-57 if the Director of Public Instruction approves of the proposals. I agree with the Assistant Director and the proposals for the present be deferred.

COMMUNITY PROJECTS--South Kanara--Construction of a foot bridge at Tejmadi-Kodi - Memorandum of Sri K.N.Suvarna M.L.A. Enquiry Report--Submitted.

Ref: Govt. Memo No.61985 DV.54/1 dated 11.5.54.

The foot bridge referred to in the memorandum of Sri K.N. Suvarna, M.L.A is across a narrow river which separates Tejmadi-Kodi from Nadi-Kudru which is an island lying to the east of 'Kodi'. There is, however, another river- broader still- Between Nadi-Kudru and the mainland leading to Mulki town. The people of Tejmadi-Kodi and Nadi-Kudru represent that the narrow river has to be waded through during low tide as boats cannot fly, while the river further east can be crossed by boats even during low tide and that therefore a foot bridge connecting 'Kodi' with Nadi-Kudru is a felt need as women and children find it difficult to wade through the water. There are about 20 fishermen houses in the 'Nadikudru' island and the residents have to go to Tejmadi-Kodi which is on the sea side for their daily work. The residents of Tejmadi-Kodi have to cross over to Nadikudru and then cross the broad river by boat to reach the mainland. More than 100 houses in 'Kodi' will be benefited by the proposed foot bridge. A rough diagram of the locality is given below to understand the case better.

TEJMADI LANDS

RIVER | PROPOSED ~~FOOT~~ BRIDGE

NADIKUDARU

River

Mainland

The proposed foot bridge between Kodi' and Nadi-Kudru will be about 250 ft. long and it is is estimated to cost roughly Rs.15000/- Village Committee has expressed its inability to contribute 25% of the cost as it has already other commitments like the construction. of additional wing for the Fisheries Middle school estimated to cost Rs.22000 out of which the community Project has sanctioned Rs.5000/- There are other activities like a youth club, adult schools, Hindi class etc. The residents are mostly poor fishermen, but the cooperative spirit and enthusiasm for the development of the community are praise-worthy and therefore they deserve all encouragement. During my visit to the locality the villagers have agreed to contribute about Rs.2000/- by way of labour and cash. Sri K.N. Suvarna, however assures me that he will see that 25% of the cost is contributed by the villagers. I am therefore taking steps to get the estimate prepared. Formal approval of the Government may be accorded to undertake the work on condition of the people contributing 25% of the cost.

Sir,

Sub: Fisheries - Memorandum to M(A) - Requests

Ref: Your letter to M(A) dated 10.5.54.

With reference to the requests contained in the letter cited, I am directed to state as follows:

Allotment of private land to the fishermen of Kodi for putting up houses

The Collector of S. Kanara has taken necessary action to accommodate the affected fishermen on account of the gale.

Grant of Subsidies to fishermen who have lost their fishing equipment as a result of the gale

In view of the representation received by the Govt. separately from the fishermen and S. Kanara Dt., the Govt. already sanctioned in July 1954 the necessary expenditure for the grant of relief to them. The P.E.O, Mangalore has further reported to Govt. that the fishermen's Co-operative Society in the locality is assisting the fishermen by granting them loans.

Conversion of the Fisheries Higher Elementary School at Kodi into a High School

The D.E.C, Madras has promised to submit necessary proposals to the Govt. for consideration (~~as a Part II Scheme for 1956-1957~~.) The proposals when received will be examined by the Govt. ~~the matter will receive attention in due course.~~ be considered in connection with the proposals for

Construction of a foot-bridge connecting Kodi with main lands

Govt. are considering this proposal; the ~~proposals under Consideration~~ proposals for D.E.C are ~~of the Govt. in Public (R.W.D) Deptt.~~

...

Sub: Education - Sec. - Fisheries Hr. Ele. School at Hejmadikodi raising into a High School.

Ref: Your letter No.6004-)/54 dt. 21-7-1954.

...

There are three High Schools one Government, One District Board and one Aided Secondary School within a radius of 2 to 2½ miles from the Hejmadikodi Fisheries Hr Ele. School As such if the Fisheries H.E.School is raised to the status of a High School it will affect all the 3 existing High school mostly the Board High School Hejmadi which was started only last year and it will become a full fledged high school in 1955 only. As such there is no scope for another high school in the locality where there are already 3 hig. schools.

If Fisheries technique is to be taught to fisher children a special tutor may be proposed to be appointed in the Board High School at Hejmady and these fisher children may be given scholarship to cover the ordinary and special fees to be paid by them. This is more economical than running special high school for fisher children by Govt. in the area already served by 3 high schools.

Rc.No.46588 X1/54-9 dated 15-4-1955.

Sir,

Sub: EDUCATION - Fisheries School at Hejmadikodi in South Kanara District - Raising into a High School-regarding
Ref: Government Memo No.7879 C.II/55-3 dated 31-3-55.

I submit below my remarks on the suggestion of the District Educational Officer, Mangalore contained in his letter No.8432 B1/54 dated 26-10-1954.

2/ There are three fisheries High Schools in the State at present one at Madapalli in Malabar district, one at Bekal and other at Malpe in South Kanara district. Only at the fisheries Technical High School at Madapalli, fisheries Science is taught to the students as an optional by the appointment of an Instructor in fisheries in Technology. The fisheries science is not taught in the High Schools at Malpe and Bekal. Proposals have been submitted to Government in this office letter No.40756 X1/54-9 dated 13-2-1955 for the introduction of the bifurcated course of studies in the fisheries Technical High School at Madapalli (vide Government Memo No.104489-C.II/54-1) dated 19-8-54. After gaining some experience proposals for introducing the diversified course in the other two High Schools will be submitted. Appointment of a Special Tutor alone will not serve the purpose. Lectures in (a) Navigation and Seamanship, (b) Co-operation and (c) fishing are also to be given by departmental officers. If the school is under the control of the District Board, it may not be possible.

3/ If fisher children studying in the Board High School are given scholarships all fisher children studying in other high schools in that locality may hasten to join this particular school or the fishermen in that locality may ask for this scholarship to be extended to all the High Schools in that locality. If this is done there may be a clammour for extending this facility to all places where there are no fisheries High School catering to the needs of the fishermen. Hence this suggestion also does not appear to be sound.

4/ As the District Educational Officer is not for the opening of a new High School in that locality for the present, I submit the question of raising the fisheries Higher Elementary ~~High~~ School at ~~and~~ Hejmadikodi into a High school may be dropped.

SUPERINTENDENT.

The Representation from the fishermen of Kodi to improve their lot is examined below:

Request No.1. To allot private land to fishermen of Kodi for putting up houses.

The P.E.O., Mangalore has no remarks on the report of the Collector of S.Kanara on the request. The D.I. & C. also says that the report of the Collector will be useful in the matter and that the Asst.Director will do whatever possible. The Collector says that out of the 25 families who were affected by the gale, 15 families have already found accommodation in and around the locality and remaining 10 families are temporarily occupying the houses of their relatives and that a promboke land in S.No.35/2 B.1 of the village has been selected by the R.D.O. for settling the families. It is also reported that the fishermen are willing to settle down in the above land. Hence no action is called for on the request.

Request No.2. To grant subsidies to the fishermen who have lost their fishing equipment as a result of cyclone on 9-1-54.

The P.E.O., Mangalore reports that the local fishermen's Coop.Society is assisting the fishermen who are in hardship by granting them loans etc. Here also the D.I. & C. says that the report of the Collector in the matter would be useful. The Collector says that he has called for reports from the Asst.Director of Fisheries and Revenue officials and that the question as to what relief is called for will be considered on receipt of their reports and that he will submit a further report on the matter.

So far as C.P. side is concerned no subsidies are given and therefore the request of the fishermen cannot be entertained from C.P.funds but may be taken up for consideration by the regular department. It is presumed that the regular department is taking separate action in the matter.

This memo is submitted for Section Officer's information
8/6/54

Request No.3: To convert the existing the Higher Ele. School at Kodi into a Technical School.

The P.E.O. says that it is a matter for consideration by the Education and Fisheries Deptts. It is also reported that there is already a High School within a radius of 1 mile from Kodi. The D.I. & C. says that he is asking the Asst.Director to look into the matter. The Collector also reports that as the school is under the control of the Fisheries Deptt. it is a matter for consideration by the Fisheries Deptt. It is presumed that C.2 are taking necessary action in the matter.

Request No.4 - To construct a foot-bridge connecting Kodi with the main land.

The P.E.O. says that this item has been included in the overall programme for the area and that the proposal will be taken up after it has been placed beforethe Project Advisory Committee for its approval The D.I.& C. also says that the P.E.O. may be asked to take up the matter. D.VI who are concerned with commmunications may see.

notes from Page 1 ante may be perused.

The following are the requests contained in this file.

(1) To allot private land to the fishermen of Kodi for putting up houses.

(2) to grant subsidies to fishermen who have lost their fishing equipment as a result of cyclone on 9-1-54.

(3) to convert the existing Higher Elementary School at Kodi into a High School, and

(4) to construct a foot bridge connecting Kodi with the main land.

Request no 1. Attention is invited at 'A' on P 3 above. In the light of the Collector's report no action is called for on the request.

Request 2 : The Question of granting relief to the fishermen affected by the cyclone on 9-1-54 is being examined seperately in file no 4411 C II/54. The reports of the Collector and the Dt. EC are awaited in that file. No action is therefore called for in this file.

Request 3. The report of the Dt. EC may be awaited till 10-2-54.

Request 4 : The proposal may be examined on receipt of the P. E. O's report (vide 'A' on P 4 above)

Agri have already indicated that the question of granting relief to the fishermen affected by the cyclone is being examined separately in file No. 44111 C II/54. This Deptt may appropriately cite its remarks in the above case when it is referred to this Deptt in due course.

However on the merits of the proposal for granting subsidies for the purchase of nets equipment viz. a. viz how have fish schemes under the administrative control of this Deptt, this Deptt may note that at present there are no schemes under the Fisheries Programme of this Deptt, permitting or contemplating the subsidised sale of fisheries equipment like yarn, sail cloth, catamaran logs etc which may be extended to cover the proposal in question. and that any relief to be granted to fishermen has

C ante

necessarily to be looked upon as normal relief operations to the distressed fishermen affected by the Cyclone to be considered further by the Agri Dept and not as forming part of Govt Work Fish Schemes relating to this Dept.

With the above remarks, the Case may be returned to Agri

Agenda

from the Collector of S. Kanara No 25862/54 dated 17.11.54
from the Director No 46588 XI/54-3 dated 26.11.54

Summary

1. In his memorandum on PP 1-3 C, Sri N.N. Suvarna, M.L.A, S. Kanara has made the following requests.

(i) To allot private land to the fishermen of Kodi for putting up houses

(ii) to grant subsidies to fishermen who have lost their fishing equipment as a result of Cyclone on 9.1.54.

(iii) to convert the existing Higher Elementary School at Kodi into a Technical High School, and

(iv) to construct a foot bridge connecting Kodi with the main lands.

2. The requests have been examined in consultation with the Collector of S. Kanara, Project Executive Officer, Mangalore and the Director of Industries

P.T.O.

and Commerce

Request no 1 :- The Collector has reported that out of the 25 families who were affected by the gale, 15 families have already found accommodation in and around the locality and the remaining 10 families are temporarily occupying the houses of their relatives and that a poramboke land in S. no 35/2 B.I of the village has been selected by the R.D.O for Settling the families. In the circumstances no action is considered necessary on this request. | A G 5/12/54

Request no 2 :- The P.E.O, Mangalore, has reported that the fishermen's Co-operative Society in the locality is assisting the fishermen who are in hardship by granting them loans etc. Further an account of the representation received separately from the fishermen in S. Kanara for the grant of relief to the affected fishermen due to Sea flood, the Govt sanctioned an expenditure of Rs 5208/- as relief to them vide Govts 2479 Agri III 27.7.54. No further action is called for on this request. For orders. | B G 5/12/54 (Y)

Request no 3 :- The D.I & C has reported that the approval of the D.P.I. could not be obtained for raising the Nagmadi Kodi Fisheries Higher Elementary School into a Technical High School and that therefore the proposals may be taken up for consideration as a Part II Scheme for 1956-57 (next year). He has stated that the proposal may be deferred for the present. It is for orders whether the proposal of the Director will be accepted. | C G 5/12/54

Request no 4 :- The Collector of S. Kanara has reported

P 113

that the Project Executive Officer, Mangalore, has been asked by him to submit a report to Govt. when the work is sanctioned. The Project Executive Officer has separately submitted proposals in Public (R.D.P.) Dept. for the sanction of Govt. for the construction of the foot bridge at Hejmadikodi. The proposal is under consideration in that Dept. No action is therefore called for on this request in this Dept. For orders.

3. The case may be circulated to M(A) for approval on the proposals at A, B, C and D on pp 12-13 above.

BS 31254 PS 31/12/54

Summarising note from the middle of pp above may be prepared.

The requests made in the memorandum on pp 1-3 cr have been examined and necessary action has been taken on all items. A, B, C & D on pp 12-13 above as may be approved.

Sub: Education - Fisheries - Fisheries School at Thegimadikodi in S. Kanara Dt. - Raising into a High School - Regarding.

GP 1-3g (k) ✓

1. In May last year, Sri N.N. Suvarna, M.L.A, S. Kanara Dt. submitted a Memorandum to MCA) in which he made the following requests.
(i) to allot private land to the fishermen of Kodi for putting up houses.
(ii) to grant subsidies to the fishermen who have lost their fishing equipment as a result of Cyclone on 9.1.54.
(iii) to convert the existing Fisheries Higher Elementary School at Kodi into a Technical High School and
(iv) to construct a foot bridge connecting Kodi with the main lands.

vide GP 11-13 Mf (k) ✓

2. The requests have been examined by the Govt. and a reply was sent to the M.L.A in their Govt. letter at PP 51-52 of (k) - the M.C.A was informed among others that the proposal for the conversion of the Kodi School into a High School would be examined by the Govt. after getting the report from the Dir. of Fisheries.

" 51 and 52 of (k) ✓

3. The Dir. of Fisheries has now submitted a report to Govt. on the proposal for the conversion of the Kodi School into a High School (vide PP 9-10 of). She has consulted the D.E.O, S. Kanara also in the matter. The Director has reported that there are already 3 High Schools in the locality

P 10 of ✓
P 9 of ✓

to serve the educational needs of the people and the raising of the Fisheries School at Kodi into a High School will affect all the three existing Schools. He has therefore suggested that the question of raising the Kodi School into a High School may be dropped. The D. E. O. S. Kamara has given an alternative suggestion to the Director. The D. E. O. has suggested the appointment of a Special Tutor in the Board High School at Kajimadi to teach fisheries technique to the fisher Children and the grant of scholarship to the fisher Children to cover the ordinary and Special fees to be paid by them instead of converting the Fisheries School at Kodi into a High School. Regarding the suggestion of the D. E. O for the appointment of a Tutor, the Director has stated that the appointment of a Special Tutor alone will not serve the purpose, but lectures in Navigation, Seamanship and Fishing will have to be given by departmental officers and that if the School is under the control of the Dt Board, this cannot be done. With regard to the suggestion for the grant of scholarship, the Director has stated that if scholarships are given to the fisher children studying in the Board School all fisher Children studying in other High Schools in the locality may claim to join this particular School and that the fisher Children in the locality will ask for the scholarship to be extended to all the High Schools in the locality. In the circumstances he has stated that this suggestion does not

This clamour for scholarship will spread to other areas in the State.

appear to be sound. Hence the Director has not supported the alternative proposal of the D.E.C. He has requested that the meeting of managing the Lutheran Higher Elementary School at Kodaikanal into a High School may be dropped.

4. It is for orders whether the proposal of the DEC at 'A' above will be accepted and if so a suitable reply may be sent to the M.C.A.

5. DECA and Finance may see for remarks.
